Don is an absolutely AMAZING professor. He really helped me understand networking, and he is HILARIOUS. Absolute must take professor. It should be noted, this class is HEAVY on the work, but that is not due to Don, but due to Cisco Netacad. He really helps

navigate it, and gives such a good understanding, that the many assignments are fairly easy.

Don Lafond is an amazing teacher, in this class he used mindtapped which could be tedious and challenging however he accepted any late work with a small penalty and was available for questions. While his lectures were long the class was enjoyable because he related the material to his own experiences and I definitely would take his class again.

Professor Don is a very interesting teacher, He tells the hard truth when needed and shows honesty. But his repeated examples with no variety can be very hard to listen to. If you put in the work you will easily pass the class, but don't expect the material to be easy. 10/10 person, ok teacher.

Great professor. As long as you do the work, you will pass. Everything is easy to get through, he gives lectures and explains the chapters, provides plenty of opportunities if you ask for them, is really understanding, and seems to enjoy what he does. I recommend taking any class with him, I will do it if I have the chance.

If you are going to take a Computer Science or related class, I highly recommend Professor Lafond, he absolutely wonderful! Understanding of circumstances plus answers emails fast with clear directions & assistance. He gives encouraging feedback & throughout the semester (online course) he was very present. You will have a great semester!
