I read the ratings before the sem and honestly thought this class (1060C) was gonna be bad. It's nearly the same to CGS1100C. All done on Mindtap/Cengage doing application training and projects to test your knowledge with a few quizzes. This also includes other assignments but they're easy, just time consuming. She does take a while with replying.

The class is very easy I got a 92 by the end of it all, and I wrote few real notes on this class due to how the test and projects are structured. The exams were honestly not all that difficult one thing I will mention is that the exams are just going over past assignments. Overall pretty easy class.

Honestly this class wasn't that hard at all. I just basically did the work, and got the grade myself. I don't understand why y'all think she's a tough grader. She gave me awesome feedbacks and got perfect scores! I wouldn't really retake her. She's also my CIS1942 instructor and her feedback is much more inspiring to me! Also made an A! Take her!

She gives a clear criteria on when things are due & what each assignment is worth, but replies to emails days later & right before the assignment is due. She needs to work on replying to emails & being more engaging with the students. If I did not already know how to use Access, I would have failed the whole class. She is ok at best.

The bundle that I purchased had a 2019 book and a 2020 access code. There were sections in the access code that were not in the book, causing much frustration, especially after spending \$200. The tutorial showed the cursor clicking without explanations. The book choice and vague email responses are a result of these ratings.

HORRIBLE. The worst professor I EVER had. She won't care about you. 120 page chapters weekly with a TON of code. If you have a question, she will tell you to reread the chapter (or ignore you). Everything is automated so she only has to grade 2 things manually (and her grading

is whack). She's just here for the paycheck. I somehow still got an A.

This professor should not be getting paid for this. There is no help from her, emails not answered, expectations completely unclear, assignments confusing, there is nothing good to say about this course. If you do figure out what to turn in, don't expect a grade in a timely manner. The college should seriously reconsider having her on staff.

I found professor Masline to be responsive and friendly. The class was well laid out, there were no tests. She placed us into loosely formed groups, which might be something better done in a real setting rather than an online one. Other than that, it was a good class with a good teacher.

Good class. Mrs. Masline was very patience and made the class interesting with all the information needed at the beginning of class. No makeups for missed assignments but she gave me a chance to do extra credit.

I took Professor Masline's class thinking it was going to be a sleeper course because I have a lot of experience with Microsoft application but much to my surprise I learned some new things to use at work. I really enjoyed her class. I got stuck a couple of times and she called me right back and walked me thru the project. Great teacher!

I took Prof. Masline's course this summer and enjoyed her teaching style. I had a personal problem that caused me to miss a deadline but I contacted her and she worked with me. She is very helpful and approachable. I am taking her again this fall. She is very professional and caring.

I took this class online over the summer.
The professor took a month to respond to someone's message. It took her a week to respond to mine. Sent 3 follow-up messages and finally got a response the last day of class, also grade changed from "C" to "B." Insults your intelligence. Assignments mysteriously disappear into "cyberspace." Grade Appeal TBA

this is the worst teacher ever... i think that all of the comments that we positive were either from before she went mia or from her, herself. maybe she spends so much time on this site trying to boost her appeal rather than actually being there for her students

This teacher is horrible. She waits forever to grade anything, she will leave some exams up for days and then other's will only be available for 1 day. She is IMPOSSIBLE to get in touch with and her typical reaction to any e-mail (when I was so lucky to get one) was "Which class are you in again? Use Blackboard!" *which she never replies to*!

This is for an online class. She did not respond to student questions or concerns. Class was not paced well. There was an assignment every 10 days but at the end of the class there are only a couple days between due dates. Last assignment was due on the last day of the final exam period. Other classes ended 3 weeks earlier. Got an "A" but ???

Worst teacher ever in an online class. My entire class can not contact her by phone, email, or discussion board. She does not post grades or even make the tests available to take! Every one is confused and lost in what could be an easy class. There is page after page on the class discussion board directed to her and she has not responded once. BAD

If you are not VERY familiar with computers, if you are not a strong independent student....DO NOT TAKE THIS CLASS. Most material is very simple. The three main projects can be very confusing and you are totally on your own! She is very slow to respond, and never says enough to help you. ugh

She is very clear about her requirements, only has you learn what you need to know. For the online class, there is 1 assignment a week, then a midterm and final. Only problem is that we would go for days and sometimes a week or two without hearing from her at all. She always took care of it though.
