By far the best Capstone professor and professor in general. Super supportive and uses his expertise and experience from industry to help students. Getting an A in this class is the bare minimum, as he encourages you to go above and beyond. Nothing feels forced or restricted, as he has a lot of flexibility with deadlines, project directions, etc.

The greatest CSCE professor of all time. He would invite guest lectures so that we don't only learn from him, but also from people who have been in the field. That helped me with HWs, final exams, and team projects in this class. He would also encourage us to join the SRW, which is a resume booster. Build your schedule around his class!

I love this man. I don't enjoy coding at all, nor do I really need it. I'm an Elen major so this class is just something I have to get through. He's incredibly patient and generous. I will say, if you have 0 coding experience, his lectures will be hard to follow, but he's so sweet and helpful, he will gladly help if you reach out!

Dr. Kumar is among the best professor I had at A&M. He is invested in your growth and is easily accessible outside of class. I had the opportunity to conduct Cybersecurity research focusing maritime security with him. His lectures are super fun. He also has additional career advising office hours where he connects you with his industry friends.

Dr. Kumar is an fun, interesting professor. He cares heavily about the students in his class, going to the lengths of learning student names. The coursework for this class is a lot, but there is nothing that Dr. Kumar can do about it. Most of the learning should be done on the zybooks with Dr.Kumar reinforcing concepts. Beware confusing analogies.

Prof. Kumar is not your typical college professor. Not only does he learn everyone's names, but he loves interacting w/ them. Has Kahoots and prizes. Very personable. The way he teaches is a hit or miss depending on who you are. He makes many analogies which can be helpful, but it can also be confusing. Has a lot of self learning outside of class.

The professor's classes are engaging and well-structured. Using interactive tools like Kahoot in every class makes the learning process fun and dynamic. With extensive knowledge of blockchain, the professor

also encourages students to participate in academic activities, such as writing papers and competing in poster sessions at conferences

Professor Kumar is an outstanding professor who brings CSCE 120 to life with his extensive cybersecurity and C++ expertise. His engaging lectures simplify complex concepts, making them beginner-friendly. Beyond class, he offers valuable career and research guidance, ensuring students are well-prepared for success in the field.

Prof. Kumar's Blockchain course was well-structured, and very interactive, and included relevant guest lectures that enhanced the curriculum by giving industry insights. He is highly knowledgeable, accommodating, and always available to answer questions. Overall, it was an amazing learning experience far exceeding my expectations.

Dr. Kumar clearly cares for all his students very much. His lectures, while sometimes going off-topic, are valuable and heavily encourage participation. The course is very doable if you commit to doing the homework honestly and studying. The homework gets tougher as the course goes on, so start early in the week. Exams aren't too bad either.
